## A Funny Thing about the Trinity

### Skunks and Evolution

By Fr. Frederick Edlefsen

*"Until the 1960s, all of the spotted skunks found across the United States were considered to be the same species. Then Rodney Mead, a graduate student at the University of Montana, began looking at their reproductive biology and discovered something startling. Populations living in the western United States exhibited delayed implantation, breeding in late September and delaying their pregnancies so they could give birth in May. Yet spotted skunks found in states east of the Continental Divide bred in March, exhibited no delay, and gave birth in June. Thus, the eastern and western populations were reproductively isolated. With this information, Mead classified two species: 'Spilogale gracilis' in the west and 'Spilogale putorius' in the east." (Montana Outdoors, March-April 2016, p.24).*

New discoveries are amazing. They push back the frontiers of ignorance. Discovering that there are two skunk species—not just one—makes me wonder about the researcher. How did this affect his love life? One false move in the lab and Friday's romance is over. Did he stock up on tomato juice? If married, did his wife understand "for better or for worse"? Nonetheless, Rodney Mead's research advanced our knowledge about Natural Selection.

Textbooks say Natural Selection is "the process whereby organisms better adapted to their environment tend to survive and produce more offspring," which underpins evolution. Therefore, American skunks have evolved into two species for mere survival.

This suggests something amazing: the creative dynamics of the Trinity. God – three "consubstantial" Persons — is in no hurry to make or morph anything. He just lets Mother Nature do her thing in Natural Selection. *The Catechism of the Catholic Church* calls this "secondary causality" (CCC 306-308), which is an aspect of Providence. Meanwhile, humans like Rodney Mead try to figure it out.

But Natural Selection doesn't explain Rodney Mead. He went against Natural Selection to discover something new about Natural Selection. Something else must be going on in an intelligent man who studies skunks.

The Trinity is a creative trio of Eternal Persons - "consubstantial" in One Nature of love, intelligence, and freedom. Humans are embodied spirits that cannot be explained by Natural Selection. Evolution may explain something about matter, but it has nothing to say about spirits. We create because the Trinity creates. We contemplate because the Trinity contemplates. We are free, in the Trinity's image and likeness.

*"The Spirit itself bears witness with our spirit that we are children of God, and if children then heirs, heirs of God and joint heirs with Christ..." Romans 8:16-17*

If we are heirs to the kingdom of God, shouldn't we work to build up His kingdom? Shouldn't we be good stewards of our inheritance, using our time in prayer, our talent in charitable works and our treasure to care for the Church that God has left to us? Our Church is a treasured heirloom from God. We should treat it that way!

### TWO COMMON PRAYERS TO OUR BLESSED MOTHER

#### The Hail Mary

Hail Mary, full of grace  
the Lord is with you.  
Blessed are you among women  
and blessed is the fruit of  
your womb, Jesus.  
Holy Mary, Mother of God,  
pray for our sinners,  
now and at the hour of our  
death.  
Amen.

#### The Memorare

REMEMBER, O most gracious Virgin Mary, that never was it known that anyone who fled to thy protection, implored thy help, or sought thy intercession was left unaided. Inspired with this confidence, I fly to thee, O Virgin of virgins, my Mother; to thee do I come; before thee I stand, sinful and sorrowful. O Mother of the Word Incarnate, despise not my petitions, but in thy mercy hear and answer me. Amen.

## Algo Curioso es La Santísima Trinidad

### Los Zorrillos y la Evolución

Por el P. Frederick Edlefsen

"Hasta la década de 1960, todos los zorrillos manchados que se encontraban en los Estados Unidos se consideraban de la misma especie. Sin embargo, Rodney Mead, un estudiante de posgrado de la Universidad de Montana, comenzó a estudiar la biología reproductiva de estos zorrillos y descubrió algo sorprendente. Las poblaciones que viven en el oeste de los Estados Unidos mostraron un retraso en la implantación del embrión, reproduciéndose a fines de septiembre y retrasando sus embarazos para poder dar a luz en mayo. Sin embargo, las zorrillas manchadas que viven en los estados al este de la División Continental se reproducían en marzo, sin retrasar sus embarazos y daban luz en junio. Por lo tanto, las poblaciones orientales y occidentales quedaron aisladas reproductivamente. Con esta información, Mead clasificó dos especies: 'Spilogale gracilis' en el oeste y 'S. putorius' en el este". (Montana Outdoors, Marzo-Abril 2016, p. 24)

Los nuevos descubrimientos son asombrosos. Hacen retroceder las fronteras de la ignorancia. Descubrir que hay dos especies de zorrillos, no solo una, me hace preguntar sobre el investigador. ¿Cómo le afectó esto en su vida? Un movimiento en falso en el laboratorio y hubiera quedadoapestoso con el olor de los zorrillos. Su cita romántica del Viernes cancelada, y si estaba casado, quien sabe si la esposa lo aceptaría en la casa con tan mal olor. No obstante, la investigación de Rodney Mead avanzó nuestro conocimiento sobre la selección natural.

Los libros de texto dicen que la selección natural es "el proceso por el cual los organismos mejor adaptados a su entorno tienden a sobrevivir y producir más descendencia", lo cual es la base de la evolución. Por lo tanto, las zorrillas americanas han evolucionado en dos especies por razones de sobrevivencia.

Esto sugiere algo sorprendente: la dinámica creativa de la Santísima Trinidad. Dios, tres Divinas Personas "de la misma naturaleza", no tiene prisa por hacer o transformar nada. Simplemente deja que la Madre Naturaleza haga lo suyo en la selección natural. El *Catecismo de la Iglesia Católica* llama a esto "causalidad secundaria" (CCC 306-308), que es un aspecto de la Divina Providencia, cuyo misterio, seres humanos como Rodney Mead tratan de resolver.

Pero la ciencia no explica lo que hizo Rodney Mead. Él fue en contra de la selección natural para descubrir algo nuevo acerca de la selección natural. Esto indica que algo más debe estar sucediendo en la vida de un hombre inteligente que estudia a los zorrillos para que exhiba este comportamiento.

La Santísima Trinidad es un trío creativo de Personas Eternas, "de la misma naturaleza del Padre", que es Una Naturaleza de amor, inteligencia y libertad. Los humanos son espíritus encarnados que no pueden ser explicados por la selección natural. La evolución puede explicar algo acerca de la materia, pero no tiene nada que decir acerca de los espíritus. Somos capaces de ser creativos porque la Santísima Trinidad crea; de contemplar porque la Santísima Trinidad contempla y de ser libres, porque estamos creados a imagen y semejanza de la Santísima Trinidad.
